OF

FRUIT AND ORNAMENTAL

TREES AND PLANTS,

CULTIVATED AND FOR SALE AT THE

LAKE ERIE NURSERIES,

CLEVELAND, CUYAHOGA COUNTY, O.

ELLIOIT & CO., PROPRIETORS.

CLEVELAND:
PRINTED BY SMEAD & COWLES.
1848.
It was the intention of the Proprietors of this Nursery, to have issued at this time a full descriptive Catalogue; but want of time to enable the active proprietor to prepare such satisfactorily, and also a wish to examine, before such publication, many new varieties of fruits, fruiting for the first time at the West this season in our grounds, is the excuse for offering to the public the present hastily prepared Catalogue, enumerative only of the varieties of Trees, Shrubs, &c., offered for sale at this time.

Our grounds now embrace twenty-five acres, planted with Nursery and Specimen Trees. Nearly every variety offered for sale, has either fruited or is now in fruit, upon our own grounds or on those of Professor J. P. Kirtland, to whose large orchards of Specimen Trees, embracing over forty acres, we have daily access. This, with the fact that all Buds and Grafts for propagation are cut and superintended in the setting by the active proprietor in person, enables us confidently to warrant every tree or plant true to the name affixed by us.

The price of Trees, Plants, &c., it will be seen, is affixed to the head of every variety, as of Apple, Pear, &c., but beyond that we wish the public to understand, that we will ever sell our Trees, Plants, &c., &c., at rates as low as they can elsewhere be procured and be guaranteed correct.

Our Fruit Trees are all worked only on healthy seedlings stocks. In Apples, those who prefer budded Trees, can have them; and so those who prefer root-grafts, by merely so stating in their order. Of Pears, although we are individually opposed to the practice of dwarfing, always being able to fruit our varieties in at the most three years, from buds on free or pear stocks, yet we have some varieties worked as dwarfs upon mountain ask, thorn, and quince stocks.
All other varieties are principally budded. Apricots, both on peach and plum.

As soils make great difference in the appearance of trees while young, and also as regards their success after being transplanted, we wish it to be understood that our soil is a sharp, sandy loam, giving to the trees a moderate, healthy growth, by which the wood is well ripened, while an excess of growth from a too rich soil is liable to leave the wood at the close of the season in an immature condition, and consequently more subject to what is termed frost or sap blight.

The proper seasons for transplanting are October, November and December, in the autumn, and March and April, in the spring. The autumn is the most favorable time for transplanting, and for the transmission of trees.

All orders must be post paid to ensure attention;—and unless the person ordering has personal acquaintance with one of the proprietors, must be accompanied with the Cash or a responsible reference, guaranteeing payment on such order in Cleveland within 30 days from its fulfillment, unless otherwise agreed upon.

Trees will be packed, when desired and charged therefor correspondingly with the manner in which they are packed, whether for carriage one hundred or fifteen hundred miles. Moss from the woods is the only article used by us to place among the roots in packing.

Orders that are to be shipped, will be executed free of expense to the purchaser until they are receipted for by the captain, clerk or master of the vessel or boat on which they are so shipped; after that time, they are at the sole risk of the purchaser. Insurance will be effected when desired.

All orders will be executed in manner same as though the person himself was present. The first received will be first executed, and so on.

Catalogues furnished gratis to post-paid applicants. Address ELLIOTT & CO., Lake Erie Nursery, Cleveland, Ohio.
FRUIT DEPARTMENT.

APPLES. — 50 cts.
